

Department of Chemical Engineering at UCT Prague offers new MSc programme

Chemical Engineering and Bioengineering

The intensive educational programme teaches our students chemical engineering fundamentals and helps develop independent and critical thinking to solve various chemical engineering and bioengineering problems. Graduates are able to analyse chemical engineering processes, design chemical equipment and determine optimal process parameters for economical, safe, and ecological operation of sustainable chemical technologies.

Language
English

Duration
2 years

Form of study
Full time

Place of study
Prague

Annual tuition fee
ca 2 800 €

"Chemical engineering is both an art and a science." (W. L. McCabe)

Why UCT Prague

- UCT Prague is one of the largest educational and research institutions focused on chemistry, chemical engineering, and related fields in the world.
- Our students actively participate in topical research and industrial projects.
- Our tutors have long-term experience from world-class universities (University of Notre Dame, Princeton University, ETH Zurich, Imperial College London).
- Prague belongs to the world's best student cities.
